MicroFoliar targets the leaf surface to naturally promote plant health, maturing and flowering. Applying MicroFoliar allows beneficial microbes to dominate the environment, suppressing disease pressure whilst enhancing photosynthesis and foliar feeding.

Key ingredients:

- ✓ Fermented microbial consortium
- ✓ Yeasts
- ✓ Lactobacillus spp.
- ✓ Photosynthetic bacteria

Key benefits:

- ✓ Naturally promotes plant health, maturing and flowering.
- ✓ Outcompetes foliar diseases.
- ✓ Enhances photosynthesis and foliar feeding.
- ✓ Allows beneficial microbes to dominate the soil and plants.
- ✓ Safe, effective, and efficient.
