SuPr-N contains up to 17% controlled release nitrogen containing a mixture of various microbial species and acids. Nitrogen in SuPr-N is split between several pools including microbial biomass, soluble nitrogen (protein peptide and amino acid), ammonium and relatively little in the form of nitrates. SuPr-N effectively acts as a controlled release fertiliser, with release continuing for a full 60 days.

Key ingredients:

- ✓ Fermented microbial consortium
- ✓ Fulvic acid
- ✓ Controlled release Nitrogen, up to 17%
- ✓ Humic acid

Key benefits:

- ✓ Stabilised nitrogen source, available immediately, as well as 1% potassium.
- ✓ Includes macro, microorganisms and trace elements.
- ✓ Enhanced with beneficial microbes.
- ✓ Naturally promotes germination, root development and plant growth.
- ✓ Balanced nitrogen for soil, foliar and compost applications.
