# HORTI-PLUS

Horti-Plus has been specifically designed as a basal fertiliser or under tree application

## BENEFITS

- Contains a carbon mineral ingredient which will increase the nutrient release of the other chemical fertilisers. It will prevent phosphorus from lock-ups and increase and maintain phosphorus activity for longer.
- Carbon to stabilise nitrogen and to improve nitrogen efficiency
- Increases aerobic microbe activity
- Suppresses pathogenic micro organisms
- Buffers the effects of excessive elements (particularly salts/sodium) toxic chemicals and heavy metals
- pH buffering capacity to help neutralise the problems associated with pH extremes
- High carbon to increase the CEC of the soil which aids in moisture and nutrient retention
- Contains silicates for more efficient photosynthesis, cell wall strengthening and as a management tool for excess sodium
- Contains minerals to improve soil structure, reduce surface crusting, and to aid in water penetration/absorption and aeration.

## TYPICAL ANALYSIS

N	P	K	S	Si	Ca	Mg	Fe	Carbon
12%	5%	14.1%	6.7%	0.5%	1.4%	0.45%	0.8%	2%

+ Trace Elements Boron, Manganese, Copper, Zinc, Cobalt, Molybdenum & Selenium

## TIMING

At Pre-Planting stage or under tree application

## APPLICATION RATES

Application Rates should be determined by soil analysis and applied in conjunction with a balanced nutritional program...

*HORTI-PLUS combined with other products can greatly improve yields in low nutrient soils, use PHOS-PLUS as a seed/set transplant treatment to give maximum phosphorus release at germination.*
